

## JOBS FOR ANY MAJOR

Are you concerned because your major is not connected to a specific career or that it might not be practical? Don't worry. There are hundreds of professional jobs that require a bachelor degree, but no major in particular. Many employers just want to hire an educated person, and train that person themselves.

Listed below are real jobs with real employers (in Northeast Ohio) that we found on various job boards in May of 2023. These jobs are entry-level, require basic experience that most college students would have, and require (or prefer) a bachelor degree, but no major in particular. In short, most new graduates would be qualified for these jobs, regardless of their major. *This is just a sampling of jobs* that were selected to represent a variety of career fields and industries.
